FOLLOWER TARGET	POSTS / WEEK	ENGAGEMENT RATE	GROWTH HORIZON

SECTION 01

Growth Diagnosis

DOUBLE DOWN — WORKING

Humorous Storytelling drives both reach AND engagement — a rare algorithm combination. The brand voice (sarcastic, warm, desi) is genuinely hard to replicate. UGC content converts browsers to buyers at 4:1 over branded claims. The "Mumbai day challenge" script format is a repeatable, ownable framework.

FIX OR REMOVE — FAILING

AI-Generated Content actively damages the brand. For a vegan/cruelty-free brand, AI content signals the exact inauthenticity your audience detests — reduce to near-zero immediately. **Photoshoot content:** beautiful but passive. No engagement prompt = no comments = algorithm suppression. Fix: engagement question as first comment within 5 minutes of every post.

Missed Opportunities

📺

YouTube Shorts

Best Reels should be cross-posted same day. Zero extra effort. Currently underutilized with significant reach upside.

💼

LinkedIn

Persona 2 (28–44 professionals) is completely absent from the current channel mix. Massive untapped segment.

🎁

Creator Gifting

No evidence of a structured nano-creator gifting program. 10–15 creators/month at ₹0 cost = sustained organic UGC.

📧

Email Capture

No lead magnet to move social audience into an owned channel. Social reach is borrowed; email is owned.

🏪

Offline-Online Bridge

2,000 offline stores are an untapped UGC army. QR codes on packaging + in-

📊

UTM Tracking

No documented tracking of social-to-revenue attribution. Flying blind on which content actually converts to sales.

store selfie challenge = free content pipeline.

SECTION 02

Growth Strategy

01

0 – 30 DAYS

Foundation Sprint

- Commit to 5 posts/week — non-negotiable
- Kill AI-generated hero content from feed immediately
- Add engagement question on every photoshoot post within 5 mins
- Set up UTM links on all CTAs
- Run 3×3 creative test on "Long Day" script (₹300/day each)
- Gift product to 5 nano creators in vegan/wellness niche
- Cross-post all Reels to YouTube Shorts — no extra effort

02

30 – 90 DAYS

Amplification Phase

- Launch "The Mumbai Standard" campaign — 8-week run
- Activate #EzeMumbaiStandard UGC campaign with creator seeding
- "Thursday Scent Wars" weekly ritual — Floral vs Woody polls
- LinkedIn content for Persona 2 — 1x/week founder posts
- Build email list: "5-Day Scent Guide for Ethical Buyers"
- Target: +10K new followers in 60 days

03

3 – 6 MONTHS

Scale & Tribe

- Launch "Eze Tribe" program — early access, co-creation invites
- Expand "The Standard" to Bengaluru, Delhi, Chennai
- Quarterly "Transparency Report" post — full ingredient breakdown
- YouTube long-form: 1 video/month (honest comparisons, tests)
- WhatsApp Business broadcast for D2C repurchase nudges
- Target: 100K followers + ₹50L/month social-attributed revenue

SECTION 03

Content Scaling System

The Weekly Content Engine

Film 4–5 pieces of content in one 2-hour shoot block per week. One scriptwriter, one on-camera talent, one editor. Target weekly content production cost: under ₹15,000 at scale.

Monday	Script writing + shot list prep (2 hours). Review last week's top performer and identify the variable that made it work.
Tuesday	Shoot day — film 4–5 Reels + photoshoot content in a single session. Batch everything.
Wednesday	Edit + caption writing + scheduling all posts for the week ahead. Post within 7:30–9 PM IST window.
Thursday	Stories + "Scent Wars" poll live. Monitor first-hour engagement on all posts. Reply to every comment within 60 minutes.
Friday	Performance review: top hook, top CTA, top format. Document findings. Adjust next week's scripts accordingly.

Repurposing Strategy

ORIGINAL CONTENT	REPURPOSE TO	EFFORT
Instagram Reel	YouTube Shorts (same day, auto-upload)	Zero
Top Reel hook line	Instagram Story poll ("Agree with this?")	5 min
Educational Reel	Carousel version (screenshot key points)	30 min
UGC clip	Story feature + "Tribe Approved" sticker	10 min
Founder Reel	LinkedIn text post (adapted tone)	15 min
Comment thread banter	Screenshot → Story with brand voice reply highlighted	5 min
Long-form YouTube video	3 Shorts cut from key moments + 1 Blog post	45 min

Viral Framework: Hook → Retention → CTA

01

HOOK

First 1.5 seconds. Stop the scroll.

- Pattern interrupt: Start with unexpected claim or confession — never a product shot
- Specific over generic: "My ex said I was too intense" > "This perfume lasts all day"
- Question hook: "Would you still buy this if you knew what's inside regular perfume?"

02

RETENTION

Seconds 2–10. Keep them watching.

- Escalate the story — make them need to know how it ends
- Visual surprise: product reveal, unexpected reaction, time-lapse check
- Relatability spike: reference specific Mumbai/Bengaluru/Gen Z experience

03

CTA

Last 2 seconds. Convert interest.

- Comment bait: "Team Floral or Team Woody? Fight in comments."
- Save bait: "Save this before your next perfume purchase"
- Bio link: "Link below — EZE20 gets you 20% off. Use it or regret it."

SECTION 04

Platform Playbooks

Instagram

YouTube Shorts

LinkedIn

PRIMARY GROWTH ENGINE

FREQUENCY

- 4–5 Reels/week (non-negotiable)
- Stories: Daily
- Carousels: 1–2x/week

ALGORITHM HACKS

- Post at 7:30 PM IST
- First comment within 5 min of posting
- Reply every comment in hour 1
- Trending audio where authentic

CONTENT PRIORITY

- Reels distributed to non-followers
- Engineer for watch time, saves, shares

LOW-EFFORT AMPLIFIER

FREQUENCY

- Daily Shorts (auto-repost Reels)
- 1 long-form video per month

ALGORITHM NOTES

- Less saturated than Instagram
- Same video = 10x more potential reach
- Keyword-rich titles matter here

TITLE FORMULA

- "Vegan Perfume That Lasts All Day in Mumbai"
- SEO-optimized, specific, outcome-led

PERSONA 2 CHANNEL

FREQUENCY

- 1x/week founder or team post
- Text posts outperform video here

CONTENT STYLE

- Founder POV and industry observations
- Employee stories — human, not corporate
- 3–5x better than product posts

ALGORITHM NOTE

- Engage with comments for 60 min after posting
- LinkedIn is comment-weighted, not view-weighted

SECTION 05

Distribution & Growth Loops

The Eze Tribe — Community Strategy

An audience consumes. A tribe participates. Convert followers into advocates who create content, defend the brand in comments, and evangelize offline. The tribe is the moat no competitor can copy.

- **"Tribe Approved" badge** — Story highlight for top UGC contributors

- **"Scent Story" monthly feature** — Spotlight one community member's authentic Eze story
- **Early access** — New launches previewed to engaged community members via DM (personal, not broadcast)
- **Long-term:** Closed WhatsApp group or Discord for top 200 tribe members

Referral & Share Loops

- **"Tag a friend who needs this"** CTA on every humorous reel — taps the social currency of the joke
- **Gift-with-purchase incentive:** Buy 2 Eze perfumes → handwritten note + sample to gift a friend
- **Referral code program:** Every customer gets a code. 10% off for the friend. ₹50 cashback for referrer.
- **UGC contest (quarterly):** Best "Mumbai Standard" video wins a 6-month supply — drives mass content creation

Offline-to-Online Loop (Underutilized Asset)

- **2,000 offline stores** are a distribution goldmine for UGC generation — currently zero activation
- **In-store selfie challenge:** Customers who post a selfie with Eze in-store get featured on Instagram
- **QR code on packaging:** Scan to share your scent story + get 15% off next order
- **Retailer co-promotion:** Incentivize store staff to share restock videos — a micro-influencer army at zero cost

KPI & Tracking System

Weekly Dashboard

METRIC	WEEKLY TARGET	ACTION IF BELOW TARGET
Follower growth	**+500–1,000/week**	Audit hook quality; test new formats this week
Average Reel reach	**15,000–50,000/Reel**	Boost with ₹500 paid behind best organic performer
Engagement rate	**>5% per post**	Add engagement CTA; reply comments faster in hour 1
Story views	**>20% of follower count**	Post more interactive polls; less passive content
Bio link clicks	**>2% of reach**	Refresh link-in-bio offer; A/B test CTA copy
UGC submissions/week	**5+ organic tags**	Activate nano-creator gifting; run UGC contest

Monthly Review Metrics

- Total follower count growth (track % MoM change — not just raw numbers)
- **Revenue attributed to social** — UTM tracking + discount code redemptions per content batch
- Top 3 best-performing content pieces: What hook, format, and CTA drove performance?
- Customer Acquisition Cost (CAC) via paid social vs organic
- Email list growth from social-driven lead magnets

★ NORTH STAR METRIC

Revenue directly attributable to social content per month.

Everything else — reach, followers, engagement rate — is a leading indicator. Followers don't pay salaries. The only question that truly matters: is social making Eze money? All decisions cascade from this metric.
